How can I leave a review for an on-site course?

Koen - 2021-08-30 - Course reviews

If you participated in a course as part of a 2020 or more recent Erasmus+ Key Action 1 project, you can submit your course review through the Erasmus+ participant report for the relevant mobility. As reviews only come from verified Erasmus+ participants, it is not possible to leave a review directly on our website.

You automatically receive an invitation to complete your participant report after your mobility. This happens if and when your project coordinator added your activity in the Mobility Tool+. If you already finished the course, but you did not receive an e-mail invitation to complete your participant report, please ask your project coordinator.

In the participant report form you have the option to indicate how satisfied you were with the course, and to leave a short course review. Your input to these questions will be provided to and published on the School Education Gateway if

- in the report you provide your consent, and
- your project coordinator has included the Course ID of your course in Mobility Tool+.

If the project coordinator has not included your Course ID, they must delete and add again your mobility in Mobility Tool+, this time including the School Education Gateway Course ID. In that case you will have to complete the participant report again. You can find the Course ID in the "Reviews" section of the respective School Education Gateway course page.

If you have any other question related to submitting course reviews to the School Education Gateway, please refer to [your National Agency](#).
