What is a digital badge (eBadge)?

Jelena - 2021-08-26 - Certification

Digital badges are validated indicators that show you have acquired a certain skill or knowledge or completed a certain task. You can use the digital badges to demonstrate that you have completed the tasks and covered the topics in each module. The badges can be placed on your online profiles or imported into your [Badgr Backpack](#).

The Badgr Backpack is a place where you can collect all your digital badges from a variety of courses and training providers. You can then provide a link to this backpack to potential employers, who will receive a clear overview of your accomplishments. For more information, see here: openbadges.org.
