## What is the difference between eTwinning and the School Education Gateway?

Eleonora - 2020-09-07 - General

Both initiatives are funded by Erasmus+ and promote innovative teaching practice across Europe. The largest teacher network in Europe, eTwinning offers a platform for school staff to create collaborative projects with one or more schools from different countries. The eTwinning platform is available for schools and teachers only. The School Education Gateway focuses on European action for schools, bringing policy and practice closer to teachers. The website is public and therefore open to other educational stakeholders in order to encourage cooperation between schools and other organisations. Learn more in this [infograph](#).
