Why can eTwinning users log in to the School Education Gateway but not vice versa?

- 2021-07-02 - Accounts, Registration & Log-in

Teachers with an eTwinning account can use the same account to log in to the School Education Gateway website. This is designed to make it easier for eTwinning teachers to use the School Education Gateway. Anyone who does not have an eTwinning account can easily set up a School Education Gateway account. Unlike eTwinning, the School Education Gateway is open to all stakeholders and not only teachers. Users cannot, therefore, use their School Education Gateway account to log in to eTwinning, which remains a platform for teachers only, and where new members are authenticated and approved by the National Support Service in their country.
