I posted a course some time ago but I cannot find it in the Course Catalogue anymore. Why is that?

Ismini - 2020-01-30 - in For course providers

The visibility of the courses is related to their start/end dates. Once a course has finished, it will no longer appear in the Course Catalogue search results. If your course has not yet finished but you still cannot find it there, we recommend that you check whether you have indicated the start and end dates correctly. Moreover, please note that the courses are displayed in chronological order by default, with the upcoming ones at the top of the list. This means that the later your course is scheduled to start, the lower in the list it will appear.
